

Weekly Report: [W05]

General Information

- **Group ID:** 05
- **Group Name:**
- **Class:** 25A01
- **Project Name:** Super Mario Game
- **Date range:** 2026-07-06 – 2026-07-11
- **Github Repository:** [TBD]

Tasks Completed This Week

25125032 - Lê Minh Nhật

- Finalized core entity definitions, properties, and base classes for game characters, items, and blocks.
- Designed the entity class diagram outlining member attributes, visibility, and virtual methods.
- Commenced design of the map loader and tile grid rendering module using SFML.

Evidence:* Github commit history, [Super Mario Entities.pdf](#)

25125046 - Vũ Mai Thùy

- Finalized core entity definitions, properties, and base classes for game characters, items, and blocks.

- Designed the entity class diagram outlining member attributes, visibility, and virtual methods.
- Commenced design of the map loader and tile grid rendering module using SFML.

Evidence:* Github commit history, [Super Mario Entities.pdf](#)

25125017 - Nguyễn Đăng Khang

- Planned out classes and relationships for MVC architecture, specifically connecting Controller, View, and Model layers.
- Researched SFML 3.0 window events, controller binding, and rendering pipeline interfaces.

Evidence:* Github commit history

25125065 - Bùi Viết Thành

- Planned out classes and relationships for MVC architecture, specifically connecting Controller, View, and Model layers.
- Researched SFML 3.0 window events, controller binding, and rendering pipeline interfaces.

Evidence:* Github commit history

25125014 - Nguyễn Đức Huy

- Coordinated structural review for entity architecture designed by the team.
- Reviewed level loading patterns and map structure parser design.

- Generated documentation, planned tasks for phase 2, and organized repository layouts.

Evidence:* Github commit history

AI Usage Declaration

- Used AI to review class relationships for MVC correctness and clean modular definitions.
- Leveraged AI to outline level map data loading structures.

Tasks Planned for Next Week

- **Task 1:** Complete tilemap parser logic to successfully load and display a static test level.
- **Task 2:** Implement basic movement and physics collision loops for Mario with the ground block entity.

Issues

- **Issue 1:** Decoupling entity representations from concrete SFML render functions.
- **Resolution:** Separated physical properties in the Model layer from SFML textures in the View layer.
